PERSPEX® FROST

Get into shape!

Part of the innovative range of Perspex® solutions, Perspex® Frost has been a real crowd pleaser since it was originally launched in a range of subtle Pastel colours. A couple of years later the heat was turned up with the addition of Hot Frosts – a range of warm and exciting colours to give designers of internal and external POS and signs even more colours to choose from.

Now we have added even more choice to the Perspex® Frost range with the development of two new colour collections – Urban and Vivid.

Perspex® Frost – the winning line-up:

- ▣ **Vivid** – Cutting edge modern colours: creative and cosmopolitan
- ▣ **Urban** - Cool, contemporary urban chic, a collection for a sophisticated loft lifestyle
- ▣ **Hot** – Make a strong and confident statement with these dramatic tones
- ▣ **Pastel** – Timeless and elegant, the classic Frost colours retain their allure

Superb features

Whichever colour you choose, you can be confident in the exceptional Perspex® Frost product performance

- ▣ Cool frosted surface
- ▣ Modern contemporary appeal
- ▣ Resists surface marks and scratching
- ▣ Easy to cut, join and fabricate
- ▣ Retains frosted texture after thermoforming

An inspired choice

Whether you choose one of the zingy new Vivid or Hot Frosts; a Pastel classic or the latest Urban shade - with Perspex® Frost you not only get an unrivalled choice of colour, but also the superlative service, guaranteed product performance and exciting innovation that you know you can rely on.
