

PERSPEX® PEARLESCENT

PERSPEX®
FROM LUCITE®

Shimmering sheer lustre

Part of the innovative range of Perspex® from Lucite® solutions, Perspex® Pearlescent has been specially created to offer a deep, opulent effect to designers and specifiers.

In POS display, visual communications and other areas of design, such as furniture and interiors, Perspex® Pearlescent has a unique appeal to produce products with a softly shimmering lustre.

Perspex® Pearlescent is available in five exciting colour options to offer even more choice in today's contemporary retail environment.

Superb features

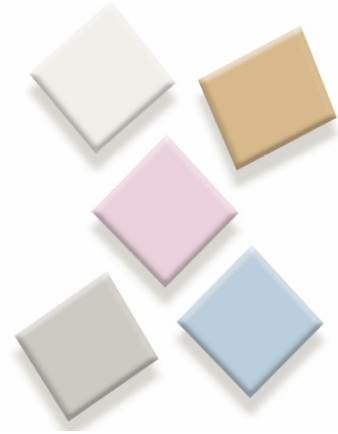

- ▣ Soft shimmering lustre
- ▣ Fascinating visual effect
- ▣ Easy to cut, join and fabricate
- ▣ Special thermoforming effects

The lustre in Perspex® Pearlescent can provide exciting and unusual variations during bending or thermoforming and can be even further enhanced by subtle changes in light source and direction – so that virtually every POS display item crafted from Perspex® Pearlescent could be considered almost unique!

Product range

Five subtle shades
Sheet size: 3050 x 2030mm
Sheet thickness: 3mm

LUCITE®
The source of inspiration

Perspex® Pearlescent is a single sided product, use face side only. The beauty of the pearlescent effect is due to the nature of the pigments used reflecting light in a number of directions. Some variation in natural or perceived colour will occur. This natural variation will also provide a directional effect. Adjoining samples should therefore be cut in the same plane. Perspex® and Lucite® are registered Trade Marks of the Lucite International Group of Companies.
