

PERSPEX® VARIO

Variable geometry in action

Perspex® can now take us on an unforgettable journey to explore new horizons where the magic of the Tropics is embodied by Perspex® Vario.

A sense of movement and energy emanates from these 6 new transparent colours, with the striking fluorescent edge producing an even more eye-catching result. The variations of light and shade are almost endless and the surface colour changes as the angle of vision shifts. The contrast provided by the edge effect gives an even greater depth to the material, depending on the size and thickness of the sheet used.
